Job Name: \_\_\_\_\_

See second page for instructions to each step.

1) Designer Fabric #: \_\_\_\_\_

Cording Fabric #: \_\_\_\_\_

Single Cording  Double Cording

2) Spa Manufacturer: \_\_\_\_\_

Brand: \_\_\_\_\_

Model: \_\_\_\_\_ Year: \_\_\_\_\_

3) My cover is measured for a: (circle one)

Shell Fit      Cabinet Fit

4) Cover Design: (circle one)

Bifold

Quadfold

Multiple Panels (3 pc or more)

5) Skirt/Flap Size: (circle one)

1"    2"    3"    4"    6"    8"

6) Note: X marks the approximate location of the 4 lock down straps. If you want straps located other than where they are pictured, please indicate position, giving measurements from corner, hinge, etc.

7) Hinge Fold: Fold is shown. Fill in measurements accordingly. If you want a different fold, please indicated with a dotted line.

8) Using the appropriate spa shape at right, fill in all the dimensions in inches (example 79" not 6'7").

10) Comments: \_\_\_\_\_

2) If you know spa brand/model and year, please fill in this information. If your spa has lip mounted air controls, buttons, or a handrail, etc., which will interfere with the spa cover fit, please send a cutout template.

3) **Fit:** For a shell fit spa cover, measure from outside acrylic lip to outside acrylic lip. Shell fit is how the majority of spa covers are ordered (see illustration area below). If you prefer a cabinet fit spa cover, measure from outside wood lip to outside wood lip (see illustration). Always give dimensions in inches (ex. 69" x 89 1/2").

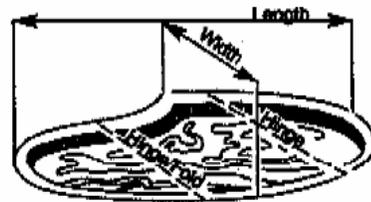

4) **Cover Design and Taper:** Bifold spa covers are tapered 4" to 2.5" for water run off. Bifold is how the majority of all spa covers are ordered. This design is available up to 96"x96" in any shape. Quad-fold spa covers are a flat 4" thick for center panels with a 2.5" taper for outer panels and available up to 99"x99" in any shape. Custom covers are available in multiple panels and larger sizes.

5) **Skirt/Flap:** Order the skirt in even inches only (see illustration above).

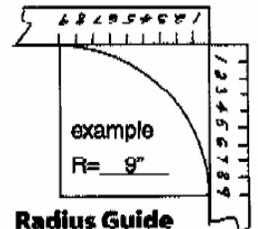

6) **Lock Down Straps:** Spa covers are required to have four lock down straps without exception. Two straps will be equally spaced on each handle end. You may move or add straps on the shape drawing with an "X" for location and measurement from the corner of the hinge (over four lock down straps will add cost).

7) **Hinge Fold:** Most bifold spa cover hinge length will be the shortest direction for strength. If your spa cover is installed with a spa cover lift or if you wish to add a lift, the direction your cover folds will be important. Fill in your shape measurements with the fold in mind. If you want a different fold, please indicate with a dotted line "-----".

8) **Template Drawing:** A drawing or template may be required for all irregular shapes, such as oval, kidney, free form, etc. If you know the brand and model, it may be matched to our template file.

9) **Radius Corners:** use a square, ruler, or tape measure to square the radius corner. The measurement from the beginning of the curve to the corner is the radius.

10) Please add any additional comments about your spa and cover in "comments".
