## *Congratulations!*

You have wisely purchased a permanently buoyant product! The occasional drips and gentle shadings in the coating should not be regarded as defects. They are a characteristic of the tough outer surface which gives this product its beauty, protective finish, and long-lasting durability. We have a few recommendations to enhance the life and beauty of this long-lasting product:

### **BUOYANCY/ SUPPORT**

All chairs, lounges, recliners and floats are designed for recreational use only. They are a flotation aid only, the level of actual buoyancy in the water is relative to the individuals weight and distribution.

### **QUALITY GUARANTEE**

Your product is made from a closed-cell foam which prevents water logging and absorption, therefore, any tears, cuts, or nicks will not affect the buoyancy or performance of this unique product. This is normal wear and tear and is not part of any store or factory guarantee. It is not grounds for replacement. Mildew is an environmental problem and is not covered under this warranty.

### **CARE AND STORAGE**

For longer life, store your product flat and dry, with nothing placed on top of it. Ideal storage is under a bed. Do not expose to freezing temperatures or hot stoves or radiators. Clean with soap and water. Stains may be removed with mild solution of chlorine.
